**Collaboration & Communication** Cross-Functional Collaboration, Client Engagement, Communication, Attention to Detail, Relationship Building
**Data & Analytics** Advanced Excel (PivotTables, XLOOKUP, Financial Modeling, VBA/Macros, Dashboards, Power Query), Power BI (DAX), Tableau, Python, SQL, Generative AI (prompt design, workflow automation), Word, PowerPoint, Outlook
**Financial Platforms** Bloomberg Terminal, Capital IQ, LSEG Workspace

## WORK EXPERIENCE

**Student Assistant JSOM Online Team** May '26 — Present
The University of Texas at Dallas

- Among the first student assistants on JSOM's new online team, guided faculty through the shift to live online teaching and built support workflows from scratch providing real-time troubleshooting across 4 concurrent live sessions weekly for 4 graduate courses.
- Standardized ADA/WCAG compliance controls across PowerPoint, Word, and PDF materials and built reusable, AI-assisted job aids, strengthening the control environment, keeping documentation accurate and audit-ready, and reducing manual handling.

**Graduate Teaching Assistant** Aug '25 — May '26
The University of Texas at Dallas

- Reconciled grades and performance data for 200+ students across 4 courses against source records, investigating and resolving discrepancies before records were finalized, with discretion over confidential, FERPA-protected data.
- Maintained a controlled records environment under recurring deadlines, applying exception-level review to high volumes of assignments and exams and correcting errors ahead of period close.

**Freshman Orientation Leader** Jun '25 — Aug '25
The University of Texas at Dallas

- Served as primary point of contact for 600+ incoming students and families, delivering front-to-back service across a high-visibility, fast-paced onboarding cycle.
- Coordinated cross-functionally with faculty and staff across live virtual sessions for international and domestic audiences, preparing and standardizing briefing and presentation materials, aligning messaging, and resolving stakeholder questions in real time.

**Business Analyst Intern** Jul '24 — Sep '24
Mentored Minds

- Performed month-end financial reporting and spend/variance analysis under tight close timelines, validating figures against source data before reporting to leadership.
- Built recurring KPI dashboards in Excel with AI-assisted workflows, standardizing reporting on performance trends and project-level profitability and giving leadership repeatable visibility into operations.
- Supported budgeting and forecasting cycles, packaging standardized financial summaries that fed leadership planning and operational decisions.

**International Finance Intern** May '24 — Jul '24
EasyShiksha

- Analyzed international financial markets and foreign exchange dynamics, examining how currency movements and trade-finance mechanisms affect cross-border transactions.
- Evaluated FX and currency-risk exposure alongside an analyst team, researching hedging and risk management approaches and their treatment under IFRS reporting standards.
- Contributed to cross-functional projects on global revenue and operational strategy, building working familiarity with variance analysis, scenario modeling, and financial planning workflows.

**Capital Market Analyst Intern** Jan '24 — May '24
Tradeshala

- Conducted market analysis and competitor benchmarking across 15+ instruments spanning equities, fixed income, forex, crypto, and commodities, building structured investment theses to support asset allocation and risk management recommendations.
- Developed and backtested multi-asset strategies applying risk-return frameworks, running 10+ scenario simulations to stress-test portfolios before review.
- Partnered cross-functionally with research and portfolio leads to translate market intelligence into trade documentation and allocation decisions, balancing return targets against downside risk.

## PROJECTS

**Chipotle Mexican Grill (CMG) FP&A Model, Variance & Power BI Dashboard**

- Built a fully linked 3-statement model of Chipotle (CMG) from its FY2025 10-K, forecasting 2026–2027 revenue from restaurant count × sales per restaurant, with a one-switch Base/Bull/Bear scenario engine that balances in every year and scenario.
- Broke down FY2025's $828M (6.5%) revenue shortfall against a budget built from management guidance, showing an estimated $699M came from weaker comparable sales rather than slower openings; presented findings in a Power BI dashboard (8 DAX measures) and a written FP&A memo.

**DFW Rental Underwriting Model Screen, 10-Year Pro Forma & Sensitivity Analysis**

- Loaded and reshaped Zillow ZHVI and ZORI data with Power Query, then ranked 166 Dallas–Fort Worth ZIP codes on rental yield and 3-year rent growth using Excel formulas. Underwrote the selected ZIP with a 10-year pro forma and 360-month amortization schedule, calculating cap rate, DSCR, cash-on-cash, levered and unlevered IRR, and equity multiple.
- Stress-tested returns with two-variable Excel Data Tables (price × mortgage rate, exit cap × rent growth). Recommended passing at a 7% mortgage: negative leverage cut the 10-year IRR from 5.0% unlevered to 1.1% levered, with DSCR below 1.0 in every year of the hold.

## CERTIFICATIONS

**Finance & Markets**, Bloomberg Market Concepts, Capital IQ Pro 101 (S&P Global), LSEG Finance Essentials, Financial Markets – Yale, Corporate Finance – Wharton, Behavioral Finance – Duke, Investment Risk Management – Google

**Data & Analytics**, Introduction to Python – DataCamp, Cisco Data Analytics Essentials, Business Intelligence, Six Sigma
